Violet Hills Charolais 9th Annual On Property Sale

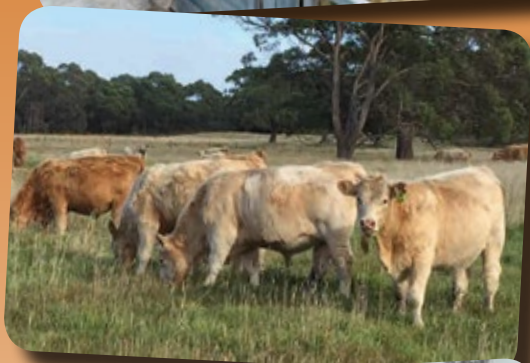

Lot 1: Violet Hills Neon (P) VHV N57E

**Sale Date:
Thursday 2nd May 2019, 1pm**

HAPPY VENDOR: Patterson and Hutchison's Russell Paterson was very happy with their results for these very good quality, Violet Hills blood steers. Their 34 head sold to \$1210 at Pakenham.

Stock and Land 13/9/2018

Audrey Scott, who farms at Stanley, Tasmania, has sent this photo of the standout calves, by Violet Hills bulls, that she is producing out of Red Angus cows. Audrey is doing an excellent job producing milk tooth cattle for the Cape Grim grass fed beef brand.

April 2019

Murray Brooker from Vacy, NSW sent this photo of the quality, Violet Hills sired, calves that he is producing out of Murray Grey cows. The country certainly looks great when so much of the state is in drought.

December 2018

Jarod Teague from Murrurundi, NSW, sent this "happy snap" of his excellent, Violet Hills sired, calves just before they went to market. His comment "not bad for drought calves". We have to agree with that.

March 2019

All of us at Violet Hills extend a warm welcome and invitation to attend our 9th Annual on property sale.

We are once again pleased to present a very good line of bulls that are of the unique type that we have been developing over the 40 plus years that we have been breeding Charolais.

All of the bulls have been drenched for liver fluke and worms on the 25/2/2019 as well as a 7:1 booster. They have also been vaccinated for pestivirus and pink eye.

After over 40 years of breeding Charolais we believe that we have gone a long way to producing the type of Charolais that suits the young grass fed beef market. This type of Charolais is also ideal for feedlot finishing as demonstrated by our purebred steers winning the Australian National Steer and Carcase competition in 2011 and 2015 and taking out the major awards for carcase quality and carcase yield most years that the competition has been run.

The last couple of years of extreme drought conditions over most of eastern Australia has placed a lot of financial and emotional stress on beef producers. The reduction of breeding cow numbers, in most herds, makes it more important than ever for beef producers to produce as high a quality product as possible. We believe that this can be achieved by using Violet Hills bulls. This is supported by the very positive feedback that we continually receive from our clients.

As well as producing easy doing, easy care cattle we have culled very heavily against poor temperament and poor hoof structure in our cattle. Needless to say, we do not trim the feet of our bulls.

This crop of bulls were raised under drought conditions, being early weaned in the summer and then grown out on a ration of cereal hay with access to DDG (by-product of ethanol production) as a protein source. Most of them are moderately framed, early maturing types, that we have found to be ideal for producing quality, high yielding progeny that are sought by the beef industry.

Our motto is

“ We will not be beaten on quality ”

*Best Wishes,
Daryl, Kaye, Sean and Kirsty*

HISTORY OF VIOLET HILLS CHAROLAIS

We started breeding Charolais in 1972. Because we had very limited finances we were restricted to using AI over British Breed cows to start an upgrading programme. This was a long and often frustrating process. While we were convinced that Charolais had a lot to offer the beef industry in Australia many of the imported genetics did not result in the type of cattle that we aimed to produce. We noticed that in Australia with our diverse pasture types, breeds of cattle and market requirements that different types of Charolais were needed for the breed to be truly successful in different locations.

Our aim is to produce a type of Charolais that suits the high quality temperate pastures of southern Australia. That is, an easy doing, easy calving animal that can be finished at a young age on grass. To produce these animals we mainly rely on selecting some of the best bulls that we produce each year and using them in our breeding programme. We find that this is more successful than experimenting with unproven genetics or genetics that are appropriate to other countries and production systems.

The most important judges of our cattle are our clients and their feedback is very valuable to us.

This year the Violet Hills herd has been reduced to about 250 breeding cows because of the prolonged drought.

Violet Hills Cattle

SALE NOTES

AuctionsPlus:

Online bidding will be available through AuctionsPlus.

Scanning and Weighing: All bulls will be scanned and weighed prior to the sale and EBV's will be updated. A supplementary sheet will be available when that occurs.

Health: Violet Hills is a jbas 7 accredited property and all bulls have been properly vaccinated for clostridium diseases, leptosporosis, pestivirus and pink eye. All have been drenched for fluke and worms. At Violet Hills it is our policy to NOT trim hooves. Any animal that exhibits problems with their hoof structure is culled. This includes all cows as well as the bulls. All bulls are available for inspection prior to the sale (by appointment) as well as the morning of the sale from 10am.

Breeding Guarantee: All bulls are guaranteed breeders. Any claim against the breeding ability of a purchased animal should be made in writing, within 6 months, and accompanied by a veterinary certificate stating that the bull is infertile or incapable of natural service, and that, in his/her opinion, the bull has not suffered any injury or maltreatment, which could have affected its breeding ability, since delivery to the purchaser. Any animal failing to breed may be either replaced with a similar animal or have the purchase price refunded on the return of the animal to "Violet Hills". This guarantee does not include interest, expenses, costs or damages this process may involve. All costs incurred for this process, will be at the purchaser's expense. This guarantee does not include problems caused by accident, disease or management after the fall of the hammer.

Inspection: We encourage prospective buyers to inspect the cattle prior to the sale. This enables us to give a more personalised response to any questions. The animals will be available for inspection from 10am on sale day.

Buyer Registration: All prospective buyers please register before the auction as a card system will be used.

Buying Orders and Phone Link Up: Online bidding will be available through AuctionsPlus. For phone bidding please contact the selling agents who will make arrangements to contact you, at the appropriate time, during the sale.

Agents Rebate: An outside Agents rebate of 3% will apply for Agents introducing their clients, IN WRITING, 24 hours prior to the sale and settling on their behalf within 7 days of the sale. These conditions will be strictly adhered to.

Refreshments: Morning teas & light meals will be available at the venue.

Accommodation: Accommodation is available at Oberon (40 mins), Lithgow (30 mins), Bathurst (50 mins) and Hampton (10 mins). Please contact us for assistance.

SALE NOTES

Delivery: Delivery instructions, in writing, must be given for stock awaiting delivery. All care of the stock will be taken during holding but no responsibility will be accepted for injury or loss during this period. Ownership of the stock will pass to the successful purchaser on the fall of the hammer. A representative of Elders and an Achmea representative will be present to insure the cattle. Violet Hills may be able to assist with delivery of the bulls and a freight subsidy may apply. Please make arrangements with either Daryl or Sean if you would like us to deliver the bull(s), as we will do so at a capped fee of \$200.00 per head to many NSW and VIC destinations. For Tasmanian purchases, we will deliver to Pages depot in Melbourne under a similar arrangement. The delivery fee will be added to the account sales. All care and no responsibility will be taken while awaiting delivery and during delivery.

Caring for your new bull: When taking your young bull home, it is a good idea to have a welcoming group of cows or steers to help him settle into his new environment. His preparation will enable him to go to work as soon as needed. As he is still growing he should be kept on good quality feed, before, during and after being with your cows.

We strongly advise against running your new bull with older bulls during joining. Your young bull will run the risk of being injured. He will also get very few calves as he will be dominated by the older bulls.

PLEASE NOTE: It is unethical for anyone to promote, advertise or arrange the sale of any cattle, other than those in the sale, on the sale premises.

IMPORTANT NOTICES: While all care is taken in compiling the catalogue, the vendors give no guarantee to the accuracy of the information contained in it. All persons who attend the sale do so entirely at their own risk and the Selling Agent, its members, subsidiary or related corporations, officers, agents, employees and its principals for themselves and for those for whom they act, do not assume or accept any responsibility or liability of whatever nature for any injury or damage whatsoever which may occur.

WITHDRAWN LOTS: In the process of compiling this catalogue two lots were withdrawn from the sale. They are lots 41 and 46. You will notice a heading of "Withdrawn" in this space in the catalogue.

Bring gumboots, a jumper and coat.

The sale ring is undercover, however the cattle are in the open and the weather can be unpredictable.

We're focused on your community's growth

Proud supporter of Violet Hills Charolais

We're an agribusiness bank. That's why we're committed to the growth of your communities and businesses. Our local experts live and work where you do.

Charolais BREEDPLAN

Estimated Breeding Values (EBVs)

EBVs are aimed at putting value on certain traits. These values can be compared with the breed average value for that trait for those recorded animals that have been born in the same year. An accuracy figure gives the percentage chance that these allocated values will be achieved. For young animals with limited recordings there can be very big changes in their EBVs as more measurements are made as they get older.

In our opinion, EBVs can give an indication of how they compare to their mates in the same herd. Caution should be used when comparing animals in different herds unless the accuracy of the figures is above 80%.

+\$25	+\$34	+\$18

Australian Charolais Selection Indexes

There are three standard selection indexes calculated for Australian Charolais animals. All are expressed in \$ per progeny returns, to the producer, when that animal is used.

These are:

1. Domestic Index (Dom)
2. Export Index (Exp)
3. Northern Terminal Index (N Term)

Each selection index has been developed for a different production/market scenario

1. Domestic Index

Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base (e.g. Angus) targeting grass finished production for the domestic trade. This Index assumes pasture grown & finished steers weighing 430 kg (240 kg HSCW and 6 mm P8 fat depth) at 12 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback positive emphasis has been placed on finishing ability.

Charolais BREEDPLAN

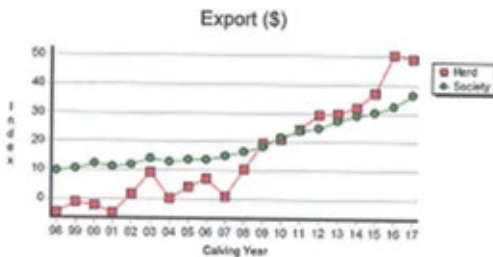

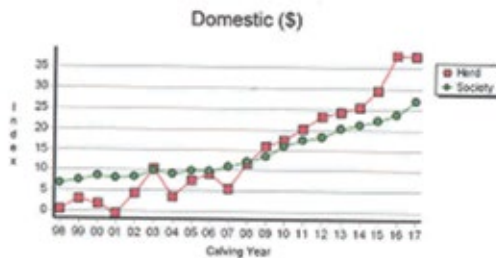

2. Export Index

Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base (e.g. Angus) targeting the production of steers for export markets. This Index assumes pasture grown & finished steers weighing 700 kg (380 kg HSCW and 9 mm P8 fat depth) at 29 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback a positive emphasis has been placed on finishing ability.

3. Northern Terminal Index

This index is probably of little interest for producers in the southern states.

At Violet Hills we have achieved continued improvement in both indexes and for a number of years have exceeded the Charolais breed average for both the Domestic and Export Indexes. Special emphasis continues to be placed on calving ease and the ability to finish at a young age.

Jacquard is a thick, easy care polled bull, whose calves are thick and impressive from the day they are born. He is a trait leader for low birth weight and has a Domestic Index which is in the top 10% for the breed. Being a very early maturing bull, his calves can easily be turned off at a young age as prime vealers.

Nepean (P) is a low birth weight, thick, moderately framed, polled bull by Jacquard. This is the type of bull that will produce excellent calves that will perform very well on grass at a young age. He is the exact opposite to those tall, rangy Charolais that give the breed a bad name. He has a Domestic Index that places him in the top 10% of the breed. This is a true indication of how profitable he would be.

Australian National Field Days (Orange) Steer and Carcase competition results

Violet Hills entered two teams of purebred Charolais steers in the Australian National Field Days Steer and Carcase competition 2017-2018. We had two different sire groups. Both teams were from the bottom end of the pure bred calves out of first calf heifers. This resulted in lower carcase weight and only average performance on grain. When the steers were slaughtered the results were very pleasing.

- ▶ 1st and 2nd for dressing percentage
- ▶ 1st and 3rd for MSA eating quality
- ▶ 2nd and 4th for saleable meat yield
- ▶ 2nd and 3rd for carcase quality

One team came 3rd overall in the competition.

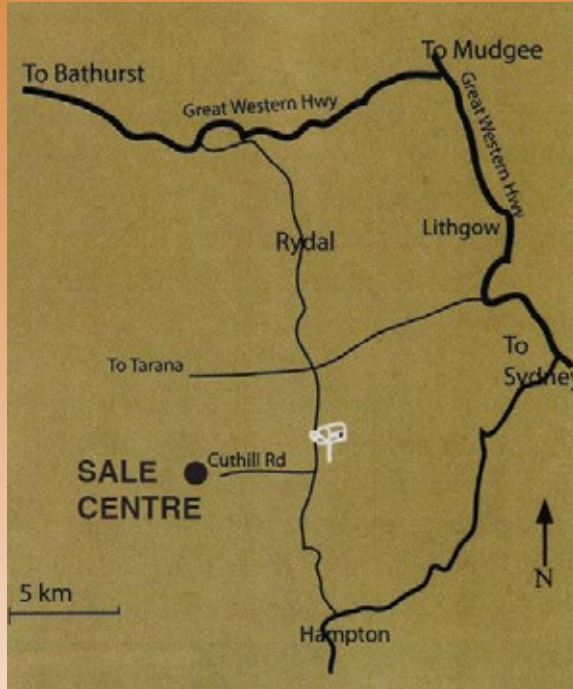

Purebred steer that was Reserve Champion on the hoof

This clearly demonstrates to us that we are producing the type of Charolais that performs very well as a purebred and does not need to be crossed with British breeds to meet industry requirements.

DIRECTIONS TO “VIOLET HILLS”

Rydal is between Lithgow and Bathurst, 150km west of Sydney.
“Violet Hills” is 13km from Rydal on the Rydal-Hampton Road.
The Sale Centre is 3km along Cuthill Road.
